Author Index to Volume 116 (2000)

Area, I., E. Godoy, F. Marcellán and **J.J. Moreno-Balcázar,** Ratio and Plancherel–Rotach asymptotics for Meixner–Sobolev orthogonal polynomials 63– 75

Berselli, L.C. and **F. Saleri,** New substructuring domain decomposition methods for advection–diffusion equations 201–220

Brown, B.M., M.S.P. Eastham and **D.K.R. McCormack,** Resonances and analytic continuation for exponentially decaying Sturm–Liouville potentials 181–193

Brugnano, L., Blended block BVMS (B_3VMs): A family of economical implicit methods for ODES 41– 62

Cawood, M.E., V.J. Ervin, W.J. Layton and **J.M. Maubach,** Adaptive defect correction methods for convection dominated, convection diffusion problems 1– 21

Chakrabarti, A. and **Hamsapriye,** On some general hybrid transforms 157–165

Eastham, M.S.P., see **Brown, B.M.** 181–193

Ervin, V.J., see **Cawood, M.E.** 1– 21

Gerlach, J., see **Kalantari, B.** 195–200

Godoy, E., see **Area, I.** 63– 75

Hall, G., see **Usman, A.** 105–120

Hamsapriye, see **Chakrabarti, A.** 157–165

Hähner, P., On the uniqueness of the shape of a penetrable, anisotropic obstacle 167–180

Jiang, D. and **J. Wang,** On boundary value problems for singular second-order functional differential equations 231–241

Kalantari, B. and **J. Gerlach,** Newton's method and generation of a determinantal family of iteration functions (*Letter to the Editor*) 195–200

Kouibia, A. and **M. Pasadas,** Approximation by discrete variational splines 145–156

Kozubowski, T.J., Computer simulation of geometric stable distributions 221–229

Kwon, K.H. and **G.J. Yoon,** Generalized Hahn's theorem 243–262

Laurita, C., Condition numbers for singular integral equations in weighted L^2 spaces 23– 40

Layton, W.J., see **Cawood, M.E.** 1– 21

Marcellán, F., see **Area, I.** 63– 75

Matsunaga, N. and **T. Yamamoto,** Superconvergence of the Shortley–Weller approximation for Dirichlet problems 263–273

Maubach, J.M., see **Cawood, M.E.** 1– 21

McCormack, D.K.R., see **Brown, B.M.** 181–193

Moreno-Balcázar, J.J., see **Area, I.** 63– 75

Pardo, J.A., see **Pardo, M.C.** 93–104

Pardo, M.C. and **J.A. Pardo,** Use of Renyi's divergence to test for the equality of the coefficients of variation 93–104

Pasadas, M., see **Kouibia, A.** 145–156

Qiu, Y., D.M. Sloan and **T. Tang,** Numerical solution of a singularly perturbed two-point boundary value problem using equidistribution: analysis of convergence 121–143

Remiche, M.-A., On the exact distribution of the Isotropic Planar Point Processes of phase type 77– 91

Saleri, F., see **Berselli, L.C.** 201–220

Sloan, D.M., see **Qiu, Y.** 121–143

Tang, T., see **Qiu, Y.** 121–143

PII: S0377-0427(00)00313-7

Usman, A. and **G. Hall,** Alternative stepsize strategies for Adams predictor–corrector codes 105–120

van der Houwen, P.J., Note on the time integration of 3D advection–reaction equations (*Letter to the Editor*) 275–278

Wang, J., see **Jiang, D.** 231–241

Yamamoto, T., see **Matsunaga, N.** 263–273

Yoon, G.J., see **Kwon, K.H.** 243–262
